Course Objectives	<p>This course introduces fundamentals of programming, problem solving and algorithm development for students with little or no prior programming experience using Python programming language. The objective of this course is to prepare students for more advanced programming courses as well as providing an understanding of computation in problem solving and engineering as a self-contained course for those students who want to write programs for their studies and professional work. The course emphasizes structured programming, algorithmic and object thinking in a problem-driven way after teaching fundamental concepts and structures. Topics include an introduction to computers, programming languages and Python; elementary programming, selections, data types, strings, iteration, functions, GUIs (graphical user interfaces), objects and classes, inheritance and polymorphism, lists (arrays) and multidimensional lists, sets and dictionaries, files, exceptions and recursion. Weekly laboratories and assignments with different problems, practice and coding exercises will improve student's capabilities and fluency in programming.</p>							
Textbook	<ul style="list-style-type: none"> <li>- Y. Daniel Liang, Introduction to Programming Using Python, Pearson.</li> <li>- How to think like a computer scientist <a href="https://runestone.academy/runestone/books/published/thinkcspy/index.html">https://runestone.academy/runestone/books/published/thinkcspy/index.html</a> <a href="http://openbookproject.net/thinkcs/python/english3e/index.html">http://openbookproject.net/thinkcs/python/english3e/index.html</a> <a href="http://greenteapress.com/thinkpython/html/index.html">http://greenteapress.com/thinkpython/html/index.html</a></li> <li>- Richard L. Halterman, Fundamentals of Programming <a href="http://python.cs.southern.edu/pythonbook/pythonbook.pdf">http://python.cs.southern.edu/pythonbook/pythonbook.pdf</a></li> <li>- Python Practice Book <a href="https://anandology.com/python-practice-book/index.html">https://anandology.com/python-practice-book/index.html</a></li> <li>- Python Programming <a href="https://en.wikibooks.org/wiki/Python_Programming">https://en.wikibooks.org/wiki/Python_Programming</a></li> </ul>							
Learning Outcomes	<p>After successful completion of the course, the student will be able to:</p> <ol style="list-style-type: none"> <li>1 Understand programming concepts and techniques using Python Language.</li> <li>2 Use control statements, loops, functions, and lists.</li> <li>3 Understand the differences between procedural and object-oriented paradigms.</li> <li>4 Develop custom classes using encapsulation, polymorphism, inheritance, and abstraction.</li> <li>5 Learn how to use files, exceptions and build GUIs.</li> <li>6 Analyze and design strategies for solving basic programming problems.</li> <li>7 Write programs for a wide variety of problems in math, science, engineering, financials, and games.</li> </ol>							
Teaching Methods	Class discussions with examples. Labs for the demonstration							

WEEK	TOPIC	REFERENCE					
Week 1	Introduction to Computers, Programming, and Python	Ch 1					
Week 2	Elementary Programming	Ch 2					
Week 3	Mathematical Functions, Strings, and Objects	Ch 3					
Week 4	Selections	Ch 4					
Week 5	Loops	Ch 5					
Week 6	Functions	Ch 6					
Week 7	Objects and Classes	Ch 7					
Week 8	Exam Week						
Week 9	More on Strings and Special Methods	Ch 8					
Week 10	GUI Programming Using Tkinter	Ch 9					
Week 11	Lists, Multidimensional Lists, Tuples, Sets, and Dictionaries	Ch 10, 11 & 14					
Week 12	Inheritance and Polymorphism	Ch 12					
Week 13	Files and Exception Handling	Ch 13					
Week 14	Recursion	Ch 15					
<b>Assessment Methods and Criteria (*)</b>	<b>Evaluation Tool</b>	<b>Quantity</b>	<b>Weight</b>				
	Final Exam	1	40%				
	Quizzes Midterm	-	38%				
	Lab Exercises	10	12%				
	Programming Assignments	8	10%				
	<b>Total</b>		<b>100%</b>				
*** ECTS Credit Calculation ***			Language of Instruction: English				
<b>Activity</b>	<b>Hours</b>	<b>Weeks</b>	<b>Student Workload Hours</b>	<b>Activity</b>	<b>Hours</b>	<b>Weeks</b>	<b>Student Workload Hours</b>
Lecture hours	2	14	28.0	In-term exam study	10	3	30.0
Labs	2	10	20.0	Final exam study	13	1	13.0
HWs	6	10	60.0				
<b>Total Workload Hours =</b>							<b>151.0</b>
<b>Recommended ECTS Credit =</b>							<b>6</b>

(\*) You may be asked to enter an oral examination after each examination or at the end of semester.

In such a case, your final grade will be determined by oral examination.
